(500 words A; 400 words B; 300 words C)

Scenario: They say it could never happen, but it actually did. Your dad won the lottery. That doesn't mean he's turned into a big spender though. This is probably a good thing, since your mother is -surprise - expecting triplets! Dad has decided to update and add on to your 3-bedroom ranch in the suburbs instead of moving. Besides, you and your older sister like it in this neighborhood. Your parents have hired an architect for the redesign. But you have experience on a CAD system and have developed a fairly good plan. So you secretly show your work to Jeff Walton, the lead architect. Jeff likes it too, but he needs an explanation, in writing, that supports your ideas. This will go into the plans submitted to the building department in order to get a permit.

Here's what you'll have to do:

1st paragraph: Write an introduction by explaining the above scenario in your own words.

2nd paragraph: Write a description of what your floor plan looks like, and discuss **three** (3) new and/or updated features you have added with your CAD program that will make the 3-bedroom ranch a **special** home.

3rd paragraph: Offer **three** (3) reasons why this plan is so good that your family won't have to move or make big changes to the house as the triplets grow. You have to persuade everyone that you've got the solution.

4th paragraph: Go out to the internet and research words pertaining to your critical writing; include what you have found (IN YOUR OWN WORDS).

5th paragraph: Write a closing overall summary of at least 3 sentences.
