- 8 Print out and proofread your final copy. Staple final copy on top of rough draft.
- 9 Show paper to instructor and then place your assignment in your folder in the 2nd drawer of the tan file cabinet.

(500 words A; 400 words B; 300 words C)

Scenario: In this module, you have learned that 53% of the electricity in the United States is generated by burning coal. Other sources of electricity include nuclear, hydroelectric, solar, wind, and burning natural gas and petroleum. Vast amounts of technology are required to maintain and improve methods to generate electricity.

While learning specific functions of electricity and electrical components, you have been able to identify various products used every day that require electricity. Each day, from the moment that you wake up to a blaring alarm clock until you shut out the lights to go to sleep, you are using electricity.

1st Paragraph: Write an introduction by explaining the above scenario in your own words.

2nd Paragraph: Give **two** (2) examples of what your life would be like if electricity could no longer be produced. Describe **two** (2) activities that would be impossible to do. What would you miss the most?

3rd Paragraph: If there were no electricity, describe what you would still be able to do each day.

4th paragraph: Go out to the Internet and research words pertaining to your critical writing; include what you have found (IN YOUR OWN WORDS).

5th Paragraph: Write a closing summary by researching the internet ; explain why electricity is not needed for survival (food, clothing, shelter) in poor areas of the world.
