http(s) copied and pasted from the internet site you found for paragraph FOUR below

- 1 Remember to SAVE TO YOUR FILE LOCKER!
- 2 Right-align and single-space the **seven-line heading** - - like the one above
- 3 Double space the **five paragraphs** of your paper. Hint: Go to the menu bar to Format > Paragraph >Line Space>Double Space.
- 4 Edit your rough draft on the computer. Do a spell check too. Print out your rough draft.
- 5 Have another person edit your rough draft and write "Edited by _____" on the first page of the rough draft.
- 6 Make corrections on the computer according to the edited draft (those items with which you agree).
- 7 Go to Tools in the Menu Bar >Word Count. **Type** the word count on the final copy as shown in the heading above.
- 8 Print out and proofread your final copy. Staple final copy on top of rough draft.
- 9 Show paper to instructor and then place your assignment in your folder in the 2nd drawer of the tan file cabinet.

(500 words A; 400 words B; 300 words C)

Background: In this module you have learned how you can help the environment by using the three R's: Reduce, Reuse, and Recycle. Energy and natural resources should be used wisely. Our technology affects the environment significantly. Four important factors impacting the environment are energy use, conservation of resources, water and air quality, and pollution. Finally, an increased energy demand will consume our natural resources. Demand for energy can result in natural resources being used up.

Scenario: The landfill El Espoday Grande at the outskirts of Thomas County is filling up and at the present rate will no longer be usable in 3 years. This is the only usable landfill site in 75 miles, and the cost of creating a new site and transporting the trash to it will raise the dumping fees by 500%. The railroad is planning to build a connection from your county going past the new dumpsite to Petersville; it will be completed in the next 5 years. If Thomas County uses the railroad for hauling trash, it will only raise the price of dumping for the customer to twice the current fee.

You are the Thomas County Landfill Environmental Engineer, and good environmental policies are your utmost concern. Because of this financial burden on everyone who produces trash, the problem needs to be addressed soon. You have planned a meeting with the city managers to plot new strategies. You will be presenting a proposal for cutting landfill dumping by about 50% for all residents, businesses, and city offices.

Now, you will write a persuasive essay discussing how you will do that.

- 1st Paragraph:** Write an introduction by explaining the above scenario in your own words.
- 2nd Paragraph:** Detail the 3 R program to decrease the using of the landfill by businesses that you will propose.
- 3rd Paragraph:** Detail the 3 R program to decrease the using of the landfill by residents that you will propose.
- 4th paragraph:** Go out to the Internet and research words pertaining to your critical writing; include what you have found (IN YOUR OWN WORDS).
- 5th Paragraph:** Write a closing summary explaining what are you going to say to help convince the **city managers** to endorse your program immediately. Also tell what you will say and do to persuade the **people** of Thomas County to all do their part.
