Day 10 CrWr

Date

http(s) copied and pasted from the internet site you found for paragraph FOUR below

- 1 **Remember to SAVE TO YOUR FILE LOCKER!**
- 2 Right-align and single-space the **seven-line heading** - - like the one above
- 3 Double space the **five paragraphs** of your paper. Hint: Go to the menu bar to Format > Paragraph >Line Space>Double Space.
- 4 Edit your rough draft on the computer. Do a spell check too. Print out your rough draft.
- 5 Have another person edit your rough draft and write "Edited by _____" on the first page of the rough draft.
- 6 Make corrections on the computer according to the edited draft (those items with which you agree).
- 7 Go to Tools in the Menu Bar >Word Count. **Type** the word count on the final copy as shown in the heading above.
- 8 Print out and proofread your final copy. Staple final copy on top of rough draft.
- 9 Show paper to instructor and then place your assignment in your folder in the 2nd drawer of the tan file cabinet.

(500 words A; 400 words B; 300 words C)

Background: In this module you have learned about machining a variety of materials. You have been given a variety of problems to solve each day that have taught you how to produce a CD storage case out of wood, design a utensil for home, and recycle material into a usable product. All of these components are essential to the production industry today.

Now that you have had the opportunity to experiment with the Materials Processing module and have learned how to machine materials both by hand and with machines, we'd like to hear your thoughts.

Scenario: You are to take a stance on handmade products vs. machine made products. Tell us which one you liked best. You may use one of the products you designed in this module as an example.

Here's what you'll have to do:

1st Paragraph: Write an introduction by explaining the above scenario in your own words.

2nd Paragraph: Write a description of which project you liked, and what new updated features you might have added. Explain how you processed your materials. By hand or machine?

3rd Paragraph: Explain how you went about solving the problem given on Day 6. Explain why you selected the design you chose. Give specific examples of how you went through the design procedure to obtain your final results.

4th paragraph: Go out to the Internet and research words pertaining to your critical writing; include what you have found (IN YOUR OWN WORDS).

5th Paragraph: Compare other designs you considered when researching your problem. Tell how and why you came to the final conclusion you did. Discuss how the final solution was created. Tell whether hand or machine tools gave you the best quality and why.
