http(s) copied and pasted from the Internet site you found for paragraph FOUR below

1 **Remember to SAVE TO YOUR FILE LOCKER!**

2 Right-align and single-space the **seven-line heading** - - like the one above

3 Double space the **five paragraphs** of your paper. Hint: Go to the menu bar to Format > Paragraph >Line Space>Double Space.

4 Edit your rough draft on the computer. Do a spell check too. Print out your rough draft.

5 Have another person edit your rough draft and write "Edited by _____" on the first page of the rough draft.

6 Make corrections on the computer according to the edited draft (those items with which you agree).

7 Go to Tools in the Menu Bar >Word Count. **Type** the word count on the final copy as shown in the heading above.

8 Print out and proofread your final copy. Staple final copy on top of rough draft.

9 Show paper to instructor and then place your assignment in your folder in the 2nd drawer of the tan file cabinet.

(500 words A; 400 words B; 300 words C)

Background: In this module you and your partner have learned some of the primary elements of the development process. Design is a broad term that is often associated with artistic expression, but it is best thought of as a thinking process involving planning with intentions and purpose. We design everything from the look of a room to the vacation we hope to take. More importantly, design describes the process of developing solutions to problems. However, the process of development needs to be clear to both the designers and the client.

Scenario: It has been an unlucky racing season for the *Jay Slick Racing Team Top Fuel Dragsters*. Both dragster bodies have been destroyed, one by a crash and the other by a trailer fire. Fortunately, nobody was injured. Because you are the Research and Development Department Head and Plant Manager of "SpeedCo International Racing Parts and Bodies," Jay called you in a panic to order two new dragster bodies. These must be delivered prior to next month's World Finals at Southern Beckon Dragway. He knows your designs continue to be winners on the racing circuit, and you always follow his exact specifications. He expects quality design and construction. Your job is to make sure the new dragsters are designed, produced, and shipped on time. But first Jay requires a description of your dragster development process.

From the information gained in this PAXTON Action LABS PROGRAM, write an essay.

1st Paragraph: Write an introduction by explaining the above scenario in your own words.

2nd Paragraph: What are the phases your designers will go through and what will be accomplished after each phase?

3rd Paragraph: What information do you need from Jay Slick and when do you think the body construction team should be asked for input on this project?

4th paragraph: Go out to the Internet and research words pertaining to your critical writing; include what you have found (IN YOUR OWN WORDS).

5th Paragraph: Write a closing summary explaining how you will know that your design will work or if modifications might be needed prior to final production.
