http(s) copied and pasted from the Internet site you found for paragraph FOUR below

1 **Remember to SAVE TO YOUR FILE LOCKER!**

2 Right-align and single-space the **seven-line heading** - - like the one above

3 Double space the **five paragraphs** of your paper. Hint: Go to the menu bar to Format > Paragraph >Line Space>Double Space.

4 Edit your rough draft on the computer. Do a spell check too. Print out your rough draft.

5 Have another person edit your rough draft and write "Edited by _____" on the first page of the rough draft.

6 Make corrections on the computer according to the edited draft (those items with which you agree).

7 Go to Tools in the Menu Bar >Word Count. **Type** the word count on the final copy as shown in the heading above.

8 Print out and proofread your final copy. Staple final copy on top of rough draft.

9 Show paper to instructor and then place your assignment in your folder in the 2nd drawer of the tan file cabinet.

(500 words A; 400 words B; 300 words C)

Scenario: Target CEO, Rick Morris, has just contacted your school. It appears he and his managers have been observing the progress you have been making on your robotics module and are interested in your knowledge and ideas. They need a robot with the capabilities that will perform a variety of tasks. They are interested in using a robot similar to Cye only larger. "Big Cye" would work in their Target stores after they are closed for the evening. Dan and his Board Members would like to hear about what you have learned about in robotics.

From your knowledge of the robotics module and research you do to write this, you need to describe for the Board different kinds of robots and their jobs, what robots are made of, and advantages and disadvantages of using robots.

Remember that this is only a WRITTEN SUMMARY of how you would explain what materials you could use and the capabilities this robot would have.

1st Paragraph: Write an introduction by explaining the above scenario in your own words.

2nd Paragraph: Using what you learned in your module, write an explanation of materials needed to build a robot. Use vocabulary words (like computer chip, end effectors, etc.) in your description.

3rd Paragraph: Give at least three advantages of using a robot for cleaning, moving products, security, etc. as opposed to humans. Give one or more reasons why it would be better not to use a robot.

4th paragraph: Go out to the Internet and research words pertaining to your critical writing; include what you have found (IN YOUR OWN WORDS).

5th Paragraph: Write a closing summary explaining how different types of robots work and what they do.
